

**Manufacturer of
Aluminium Alloy & Ingots**

Message From | Chairman | Harshad Shah

First of all let me thank you for showing your interest in our company and its product offerings. It has been our constant endeavor to be at the forefront of delivering superlative performance. It is undoubtedly an inspiring journey, which inspires us to do better and better with each passing day. My inspiration comes from BE THE LEADER, which had inspired me from the very beginning. I have always professed that one should believe in oneself to achieve the impossible.

I warmly welcome you to HARSHPRIT IMPEX LLP and request you to visit our website to view all the information you seek. And if you are not already a customer, I invite you to become one and enjoy being our esteemed business partner.

About | Harshpriti Impex LLP

HARSHPRIT IMPEX LLP is a fastest growing Aluminium ingots manufacturing and recycling firm in INDIA, with the significant technical knowledge to ensure the best output levels are achieved to produce quality products. The scale and scope of our operation coupled with deep functional and industry expertise means our customers can rely on us to meet their near and long-term supply needs.

Our | Objectives

We are committed to provide the consistent Quality products to our customers as per their Quality Standards / Specifications and Schedules.

- ❖ Meeting Customers Quality Standards
- ❖ On Time Deliveries as per Customers time frame
- ❖ Efforts towards improvement of Quality & Productivity
- ❖ Safe Working Environment

We believe in good quality and advance technologies are the key successful factors for the products. we monitors the inter-related production procedures, such as purchasing, sorting, smelting, quality control and after-sale services, to ensure the product quality and customer satisfactory.

We are passionate about helping clients. Their success is a key measure of our success.

We aim to garner the efforts and expertise of our dedicated work force in providing cost effective, intelligent solutions in a timely manner. Health, safety, and environmental issues are an integral part of all our activities providing a sense of comfort to all the project participants.

Our | Infrastructure

Harshpriti Impex LLP has a capacity of producing 6000 metric ton per annum.

We believe in supplying quality products and take stringent quality control measures at every step of production to ensure that the material is produced strictly as per the customer's requirement.

Plan Primarily Divided Into 6 Main Divisions

- ❖ Scrap Warehousing Division
- ❖ Production Unit
- ❖ Mechanical & Environment Control Division
- ❖ Quality Control Laboratory
- ❖ Finished Goods Dispatch

Right from selection of scrap and environment care, up till the final stages of production and delivery; Quality is given top priority to ensure that every consignment is well executed. Each product goes through a well defined series of processes of manufacturing and testing. This ethos guarantees optimum productivity and allows the company to grow with a streamlined business plan.

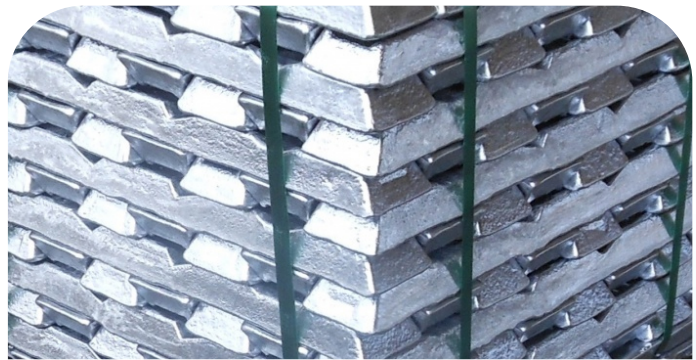

The raw material Aluminum Scrap is sourced only from the finest suppliers to ensure that our products match world class standards. The scrap is carefully selected and is hand or machine sorted for optimum attachment reduction. It is then tested for composition at the in-house laboratory before it is sent for further processing to the furnace unit.

Our Products

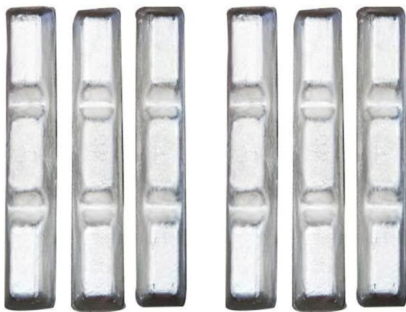

Aluminium Ingots

Variety: 96%, 97%, 98% etc

Aluminium Alloy Ingots

Variety: ADC-12, LM-24, LM-6, LM-9, ALSI-132, LM-25, High MG Alloys etc

Aluminium Notch Bar

Available Size: 1 KG, 5 KG

Aluminium Cubes

Available Size: 100 - 250 Grams

Aluminium Shots

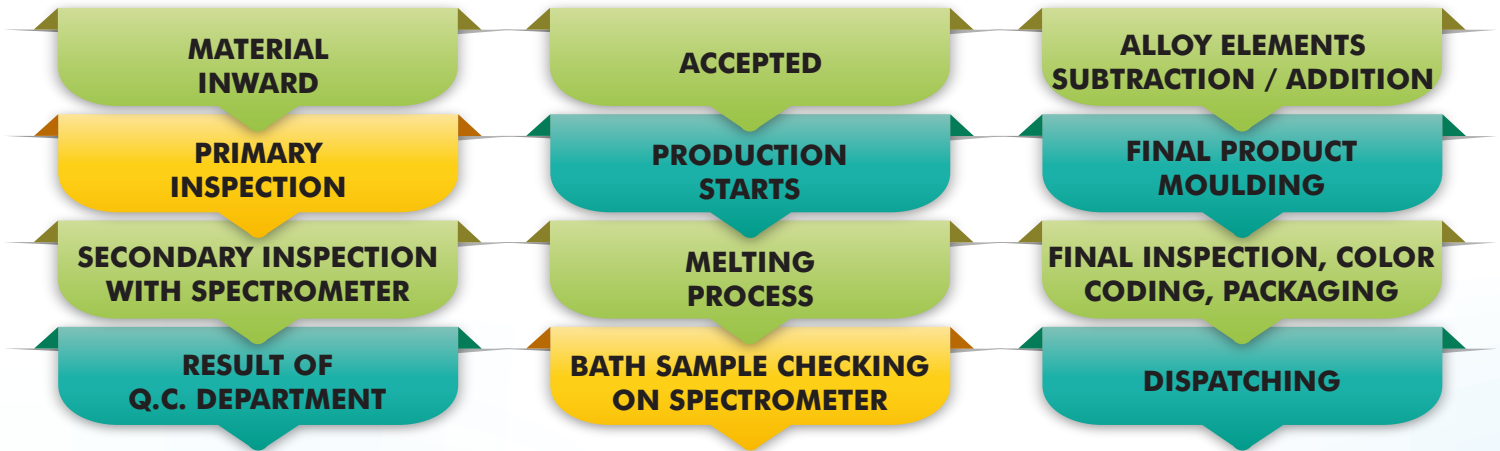

Available Size: 5 mm - 15 mm

Zinc Alloy Ingot

Variety: Zamak 3, Zamak 5 etc

Quality Accrediation

Endeavoring for the best quality and excellence will always remain our guiding doctrine; through continuous performance evaluation, up-gradation & capacity expansion, we are determined to stay ahead in the competitive globalization scenario.

Our technology and systems facilitate us to achieve the top quality that isn't only gratifying the standards but also exceeds to create a benchmark for the industry. All our manufactured products undergo strict Quality Control measures to ensure that the precise standards of our Buyers are met.

The company strictly adheres to the Quality Control techniques and procedures with the use of German made high resolution CCD based spectrometer.

We have our own in house testing lab equipped with WORLDS LEADING Spectrometer for Analysis of the Samples/Ingots to monitor the raw material, quality, the composition of the molten metal in the furnace and quality of the final alloy ingots along with Sample preparation machine. The operation parameters are closely monitored to ensure best quality products to fulfill customers' requirements as per their specification to ensure that the customer gets the best for value paid. The final testing is carried out prior to dispatch.
